GWIM

WHITEPAPER

GWIM Project White Paper

INTRODUCTION

The GWIM Project aims to revolutionize the global tourism industry by connecting the real and virtual worlds through blockchain and the metaverse. The project seeks to create an ecosystem that enables income generation for participants while enhancing their experiences in a decentralized, transparent, and secure environment.

At its core, the GWIM Project introduces GWIM Coin (GWIM), a utility and governance token that drives the platform, fostering a seamless interaction between users, tourism services, and virtual metaverse spaces. Through the integration of cutting-edge technologies, such as blockchain, decentralized finance (DeFi), and the metaverse, GWIM Project aspires to become a pivotal force in transforming global tourism.

VISION AND GOALS

VISION

To establish a global, decentralized tourism ecosystem that merges the physical and virtual realms, enhancing user experiences providing income-generating opportunities, and redefining tourism services through innovative blockchain and metaverse solutions.

GOALS

1. Establish a Global Tourism Ecosystem:

Utilize blockchain and metaverse technologies to create a seamless, transparent, and decentralized ecosystem for global tourism.

2. Redefine Tourism Services:

Enhance the efficiency, affordability, and accessibility of tourism services for participants, providing an innovative approach to travel.

GOALS

3. Enable Income Generation

Empower participants to generate income through active involvement within the ecosystem, with various leadership roles available.

4. Decentralized and Transparent Management

Implement a decentralized governance structure, ensuring transparent decision-making and a community-driven approach.

PROJECT OVERVIEW

The GWIM Project is based on a unique tokenomics structure, where the GWIM Coin serves as the central currency for the ecosystem.

The project utilizes the OKXEN Coin burning mechanism in co-relationship with X1 NETWORK to acquire GWIM coins, ensuring a deflationary effect and enhancing the long-term value of the GWIM coin.

KEY FEATURES

Blockchain and Metaverse Integration

The project operates on a blockchain platform, ensuring transparency, decentralization, and security.

Cmeevarser, GWIMLAND, serves as a virtual space for members to interact, collaborate, and manage tasks.

KEY FEATURES

- **Tourism Revolution**

GWIM Coin integrates with tourism services, offering participants access to cost-effective travel solutions, virtual tourism experiences, and exclusive services within the ecosystem.

- **Income Generation**

Participants can earn GWIM coins through participation, staking, and holding leadership roles, with the potential for promotion within the ecosystem.

KEY FEATURES

Decentralized Governance (DAO)

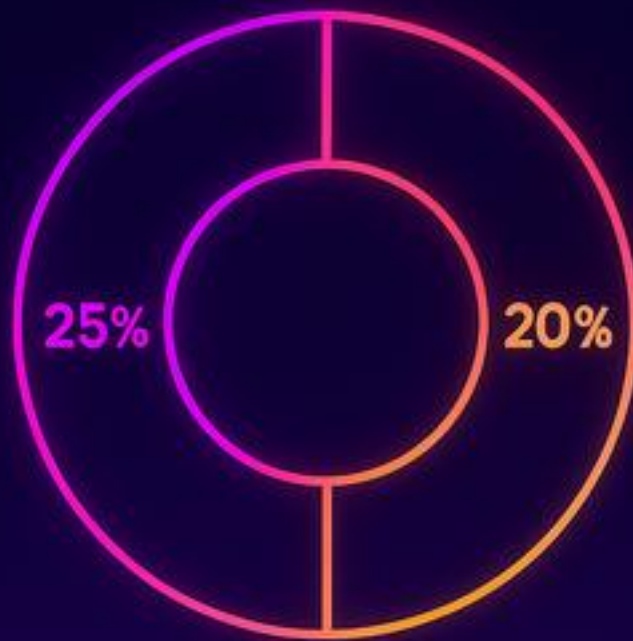

Governance of the GWIM ecosystem will be managed through a DAO, where community members can vote on key decisions related to the project.

TOKENOMICS

The GWIM Project's tokenomics are designed to ensure sustainability, growth, and long-term value appreciation for the ecosystem and its participants, GWIM Coin will drive the entire platform, with a total supply of 210.000.000 tokens.

INITIAL TOKEN ALLOCATION

1. PRE-SALE AND TOKEN SALE (25%) – 52,500,000 GWIM

- Tokens sold to investors and early participants through the pre-sale and ICO.
- Purpose: Raise initial funds for development, marketing, and expansion

2. ECOSYSTEM DEVELOPMENT (20%) – 42,000,000 GWIM

- Allocated for ecosystem growth, including app development, platform enhancements, and tourism service integration.
- Purpose: To fund R&D and the continuous improvement of the ecosystem

3

FOUNDERS AND TEAM (10%) – 21,000,000 GWIM

- Allocated to founders, core team members, and advisors.
- Vesting Period: Tokens will vest over 36 months with the first 12 months locked.
- Purpose: To reward and motivate the core team for long-term project development.

4

MARKETING AND PARTNERSHIPS* (15%) 31,500,000 GWIM

- + Funds for marketing campaigns, influencer partnerships, and collaborations with travel influencers globally.

Staking and Rewards (10%) – 21,000,000 GWIM

- Reserved for staking rewards, VIP benefits, and incentives for participants.
- Purpose: To incentivize holders and engage participants for long-term benefits.

Governance and DAO (5%) – 10,500,000 GWIM

- Allocated to support decentralized governance and decision-making through the DAO.
- Purpose: To empower the community in making key decisions for the project's future

LIQUIDITY AND EXCHANGE LISTINGS

(10%) – 21,000,000 GWIM

- Tokens for liquidity pools and exchange listings.
- Purpose: To ensure liquidity and facilitate trading for users and investors.

SECURITY AND RESERVES

(5%) – 10,500,000 GWIM

- Reserved for unexpected expenses and contingencies.
- Purpose: To ensure the financial stability of the ecosystem.

BURNING MECHANISM

- A portion of GWIM coins will be burned from transaction fees, purchases, and ecosystem activities to reduce the overall supply and enhance scarcity.

OKXEN BURNING: in correlation with X1 NETWORK ECOSYSTEM a portion of GWIM coin transaction fees also will be used to burn a specified amount of OKXEN tokens, creating a deflationary pressure on OK XEN while boosting GWIM's value.

LEADERSHIP ROLES

AND VOTING SYSTEM

The GWIM ecosystem offers participants the opportunity to take on leadership roles and earn rewards for their contributions. These roles include Emperors, Kings, queens, and Soldiers, each with specific responsibilities and income-generating opportunities.

EMPERORS

KINGS

QUEENS

SOLDIERS

LEADERSHIP STRUCTURE

Emperor

Manages an entire country within the GWIM ecosystem, holding the highest amount of GWIM coms and overseeing all operations. Emperors are responsible for allocating resources and earning a share of all profits.

King

Manages a city under the Emperors supervision, with voting rights for promotion and demotion.

Queen

Oversees a district within a city, managing operations and supervising soldiers.

Soldiers

Entry-level participants who earn GWIM coins based on performance. High-performing soldiers may be promoted to queens through voting.

VOTING SYSTEM

Promotion Voting:

The Emperor is voted annually, Kings every 6 months, and Queens every 3 months.

Automatic Promotions:

Participants who excel may be promoted automatically.

Community Voting:

Members dissatisfied with leadership can vote to replace higher-level leaders.

GWIMLAND

THE METAVERSE

GWIMLAND is a virtual metaverse ecosystem where members can interact, hold meetings, and manage tasks. It serves as a space for the community to gather, collaborate, and work towards common goals.

Access: Only senior leaders and high-ranking soldiers (with 3-star GWIM points) can access GWIMLAND.

Ownership: Members must own a virtual workspace in GWIMLAND to advance to higher leadership roles.

VIP GWIMMER CATEGORIES

VIP GWIMERS can stake GWIM coins and earn exclusive benefits, including discounts and access to special services within the ecosystem.

PLATINUM GWIMMER

Stake 1000 GWIM coins for at least 5 years and receive 20% discounts.

GOLD GWIMMER

Stake 500 GWIM coins for at least 3 years and receive 10% discounts.

SILVER GWIMMER

Stake 100 GWIM coins for at least 2 years and receive 5% discounts.

GWIM COIN LOTTERY

A monthly lottery will reward VIP GWIMERS with additional GWIM coins as an incentive to continue participation in the ecosystem.

INVESTMENT AND ASSET ACQUISITION

Revenue generated from the GWIM ecosystem will be invested in acquiring GWIM chain hotels and airlines. These assets will later be sold to GWIM coin holders in long-term timeframes, serving as reserves for the project.
